

# Beyond hard science: Scenarios about the EU's digital sovereignty

- EU Policy Talk Series

Europe today is confronted with a challenging global political environment. The digitalization of ever more areas of action and conflicts between major powers have led to the calls for European power politics in the digital sphere. These are (only) justified if they are understood in accordance with democratic values and multilateral principles and related to the promotion of open society. What future scenarios are plausible for EU's position in a growing tech rivalry between United States and China?

Dr. Annegret Bendiek is Senior Associate in the EU-Europe Research Division at Stiftung Wissenschaft und Politik (SWP) Berlin. Her current research focuses on digital geopolitics, EU cyber diplomacy, EU cyber security regulation and EU cyber defense.

Date: Thursday, October 8, 2020

Time: 11.00-12.30

Location: Online via Zoom

Registration is required:
